IT Apprenticeship

If you are interested in a career in IT, Lansing Community College provides an excellent opportunity for students to participate in concurrent on-the-job training and classroom instruction through the IT Apprenticeship Program. Upon successful completion of the program, students will earn an Associate's Degree or Certificate, Department of Labor Apprenticeship credentials and access to a variety of companies looking to hire IT professionals!

LANSING COMMUNITY COLLEGE

IT Apprenticeship Program

How it works

The IT Apprenticeship program is open to current and future LCC students interested in real, hands-on experience in the IT field. Students will take classes while working in the IT field with one of our partner companies. LCC is committed to providing students with all of the necessary resources to ensure successful apprenticeship experiences.

Benefits

The benefits of an IT Apprenticeship include **paid employment**, structured **on the job training** with related classroom instruction, **specialized skills** related to the job, and opportunities to gain **practical experience**.

Sample Apprenticeships & Credentials

IT Generalist, Database Services, Network Infrastructure and Devices, Information Assurance and Security, Project Management, Web Design and Administration, Business Technologies Management, Help Desk, Computer Programmer, and Desktop Support Technician

Partner Companies

The Apprenticeship office works in partnership with area businesses to address the growing need for skilled IT workers. Through this program, we have established opportunities with numerous companies such as:

- A.J. Boggs
- City of Lansing
- Delta Dental of Michigan
- Ingham Intermediate School District
- Michigan Association of School Boards
- Neogen
- Providence
- Spartan Internet
- State of Michigan
- TechSmith
- Two Men And A Truck

LCC West Campus

The Lansing Community College West Campus facility is located in Delta Township. It houses the Michigan Technical Education Center (M-TEC) and a Technical Training Center. Construction was completed on the 290,536 square foot facility in 2004. Included in the facility are community partnerships with companies such as General Motors, Haas, Lincoln Welding, and Siemens Building Technologies.
