CURRICULUM GUIDE

Automotive Technology, Hybrid and Alternative Fuels
Associate in Applied Science

Curriculum Code: 1763 (Effective Fall 2016 – Summer 2021)

This program prepares individuals to work as an advanced technology vehicle maintenance, diagnosis, and repair specialist. Students who complete this degree will further their education in the advanced technology vehicle field of study. Students will specialize in hybrid drive, alternative fuel, and battery electric vehicle propulsion system maintenance, diagnosis, and repair. This prepares the student for ASE testing and certification in these specialty areas. Technicians that are highly trained and certified in advanced technology vehicles are more desirable to employers. The Automotive Technology Program is a National Automotive Technicians Education Foundation (NATEF) Certified Training Program, and a National Alternative Fuels Training Consortium (NAFTC) Certified Training Center. Not all courses in this program transfer to all colleges. Students planning to transfer should see an academic advisor before enrolling in any course.
