

# State Professional Licensure and Certification Boards

## State Professional Licensure and Certification Boards

Federal regulations require LCC to publicly disclose, for each educational program designed to meet the educational requirements for a specific professional license or certification required for employment in an occupation (or advertised as meeting those requirements), information about whether program completion would meet those requirements in a state. These public disclosure requirements apply to all programs, regardless of their modality (e.g., in-person, online, and hybrid programs). LCC discloses the required information related to the educational requirements for professional licensure and certification in the table at this link.

All current and prospective students are encouraged to contact the applicable professional licensure/certification boards in their respective states for additional information regarding professional licensure/certification requirements, including, without limitation, information regarding any non-educational requirements (such as work experience, background clearance, or examination by outside entities, such as bar examinations). State professional licensure/certification requirements are subject to change at any time.
