Holt  Stockbridge
Lansing Eastern  Waverly
Lansing Everett  Williamston

Primary Features
The Early College at Lansing Community College is a three year program designed to provide mid-Michigan high school students the opportunity to earn up to two years of college credit or an associate degree as part of their high school learning experience. TEC promotes innovation and best practices in education, allows both an inquiry-based teaching philosophy and a tangible career path for our students through our science, technology, engineering and math (STEM) focus. Our students will have a personalized learning experience within a small learning community, a positive school experience and the social and academic tools to successfully continue their education or career.

Student comment:
“What I enjoy about The Early College @ Lansing Community College is that it allows students like myself an extra boost to a bright and successful future. It allows young men and women to acquire great personal connections and relationships to teachers and faculty that will take them far anywhere.”

Parent comments:
“Excellent customer service. Trying whatever it takes to accommodate learners and their families. Excellent staff. We are so pleased!”

“The program is definitely great for preparing students to enter the work force sooner than they would if they attended a traditional high school. In today’s tough economic times I feel this program is very beneficial to high school age students.”

* N = 82 students from the first cohort group (EC11): 12 Students tested in spring 2012, and 70 Students tested in spring 2013
