

Nursing: GPA Calculator

Follow the instructions below to calculate your Nursing GPA.
The complete point system is available in the Nursing [Advising Guide](#)
(www.lcc.edu/hhs/advising-guides.html).

- Enter the credit amount for each class you completed. If a course transferred in, view your LCC unofficial transcript to determine how many credits were awarded.
*If you did not complete a course or it was waived by a degree or AP exam, leave the credit, grade, and quality point fields blank.
- Enter your highest earned grade (within 2 attempts) for each course you completed.
*If you did not complete a course or it was waived by a degree or AP exam, leave the credit, grade, and quality point fields blank.
**If a course transferred into LCC from a college that uses letter grades, use the grading scale found on page 2 of the Nursing [Advising Guide](#).
- For each course, calculate the quality points by multiplying the credit amount by the grade.
For example, a 4 credit class with a 3.5 grade would equal 14 quality points for that class.
CREDIT X GRADE = QUALITY POINTS
- Add all of the credits together to determine the total amount of credits.
- Add all of the quality points together to determine the total amount of quality points.
- Divide the total quality points by the total credit amount to get your Nursing GPA.
TOTAL QUALITY POINTS / TOTAL CREDITS = NURSING GPA

COURSE	CREDITS (STEP 1)	GRADE (STEP 2)	QUALITY POINTS (STEP 3)
BIOL 201: Human Anatomy			
BIOL 202: Human Physiology			
BIOL 203: Microbiology			
BIOL 204: Microbiology Lab (optional)			
ENGLISH COMPOSITION...			
MATHEMATICS...			
NURS 201: Patient-Centered Care			
PFHW 163: Healthy Lifestyles			
COMMUNICATIONS...			
HUMANITIES, FINE ARTS, SOCIAL SCI...			
TOTAL:	<u> </u> (STEP 4)		<u> </u> (STEP 5)
NURSING GPA: (STEP 6)	 TOTAL QUALITY POINTS ÷ TOTAL SUM = NURSING GPA
